Status of the claims is as follows:

Claims 1-10 are withdrawn from consideration; and

Claims 11-26 (19-26 newly added) are herein addressed below.

Newly submitted claims 21-26 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the applicant's election on 9/7/2006 was based on Group XVI-Figures 66-73. Newly submitted claims 21-26 are not directed towards this embodiment.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21-26 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The disclosure is objected to because of the following informalities: the continuation data in the specification should be updated.

Appropriate correction is required.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3634

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Sheldon et al. (5,992,907). Sheldon et al. ('907) disclose an integrated tilt-latch/sash lock assembly (10) comprising an upper sash (16) having a keeper (38), a lower sash (14), a master frame (18) mounted both sashes, a rotor assembly comprising a sash lock housing/escutcheon (30) having an engaging tab (any portion that extends from the rotational center) and an upper surface, a cam/rotor (36) having first and second flanges (figure 2, having ridges) and having a shaft (54), an actuator (50), a handle (54), a spool (58) having an internal opening and a slot (60), a fastener received therein (the fastener is the friction associated with the slot of the spool/pawl (58) which grips the connectors), and a first and second semi-rigid connectors (62, one on each side) connecting the spool/pawl (58) to first and second spring biased latch bolts (20 and 22) coupled to a slide (68) which slides back and forth. Sheldon et al. ('907) fails to show indicia. Bujese et al. (4,229,096) disclose an escutcheon attached to a handle and having indicia. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the handle of Sheldon et al. ('907) with indicia as taught by Bujese et al. ('096) since indicia allows one to visually see the position of the handle.

The applicant's arguments have been considered but are not deemed persuasive. It appears that the applicant's arguments are more limiting than that of the claims. The applicant's amendments have broadened the claims and the art of record

still reads on the claims. The phraseology "adapted to..." fails to positively claim the recited invention and therefore carries little to no patentable weight.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
